CLAY MODELLING - ADULT 成人模型粘土

Commencing

4 February 2010

Instructor

Ms Stephanie See

Introduction

Clay is one of those things that is almost irresistible to adults and kids alike. Who can resist picking up a cool piece of clay and squashing and squeezing it; letting it ooze between your fingers or rolling it around on the palm of your hand? Not many can deny the desire to 'play' with clay; but, in this day and age, there are so many kinds of clay, where do you begin?

Modelling clay is a malleable substance used in building and sculpting. Modelling clays have been used by man for thousands of years to produce pottery, buildings, and artistic sculptures.
